Retail preferences for natural/organic foods, by age cohort - 2016 survey

“The Millennials consumer and head of household is changing the landscape of our food industry. Our survey shows that Millennial parents seek out organic because they are more aware of the benefits of organic, that they place a greater value on knowing how their food was grown and produced, and that they are deeply committed to supporting a food system that sustains and nurtures the environment.”

Laura Batcha, CEO and Executive Director of the Organic Trade Association on results of 2016 survey
$8.7 billion in sales in 2015 (D2C and intermediated)

Nearly two-thirds (65.5 percent) wholesale, not D2C

Largest segment ($3.4 billion, ~60K farms)

Farms selling food to institutions or intermediaries (such as local food hubs or wholesalers that use local branding to preserve product identity)

Other channels:

Direct to consumer ($3 billion, 115K farms)

Direct to retail sales $2.3 billion (only 23K+ farms)

D2C up from $1.2 billion in 2007 (but farms down by 21K)
Signs of Greater Profitability in Wholesale Channels

Based on ERS 2012 estimate of local food sales, $6.11 billion

$3.35 billion (54.8 percent) generated by farms that exclusively used intermediated wholesale marketing channels (22.6K farms)

$1.15 billion (18.8 percent) generated by farms that exclusively used DTC channels (115K farms)

- Sales per farm, wholesale channel users (only): 148K
- Sales per farm, D2C channel users (only): 10K

Deborah Tropp, USDA-AMS. Presentation at St. Louis Federal Reserve 12/1/2017 – Info from Local Food Marketing Practices Survey by USDA

According to the National Farm to School network.....
In the summer of 2015, Balls Food Stores launched a Double Up Food Bucks grocery store pilot in five of its Price Chopper stores in the Kansas City metro region. The pilot was so successful, it continued year-round using fresh, locally grown fruits and vegetables.

Balls Food Stores has prioritized local sourcing, working with regional aggregator Good Natured Family Farms for years. Double Up builds on this history and helps Balls benefit from this support. Indeed, more than 70 percent of the food stamps distributed was redeemed, increasing sales by more than 12 percent. There was an overwhelming amount of support from the community for the program overall.

A community food system

....is one in which sustainable food production, processing, distribution and consumption are integrated to enhance the **environmental, economic, social and nutritional health** of a particular place. It is a long-term goal toward which many communities are striving. Feenstra & Garrett, 1999
What makes community food systems work? Networks....
Why do farmers participate in local food systems?

Farmers surveyed indicate that producing food and food products for their local market …
- Provides an additional level of pride in their products (91.3%)
- Provides an added level of satisfaction (88.7%).

A high number of respondents are motivated by their …
- Contribution to the quality of life in their community (78.6%)
- Additional income local foods provides to their operation (79%)
- …and to family members (63.7%).

Many respondents agree that local food markets …
- Provide an added level of independence for agricultural producers (79.1%)
- Provides for a better working environment for themselves, their families and workers (64.1%),
- Allows them to concentrate on high quality products (77.2%)

Creating wealth that is “rooted in place through local ownership and control and building more self-reliant and resilient economy.”

Build lasting livelihoods – the capabilities, the assets - both material and social resources - and the activities required for a means of living.

Think in terms of Net – Measuring both what creates and what takes away from the capitals.
What is wealth?

Wealth is, simply put, the sum total of the assets we own as a society.

Perhaps our economic model of prioritizing financial wealth (stocks, bonds, GDP) has compromised other wealth creation on multiple scales.
Human Capital: The existing stock of skills, understanding, physical health, and mental wellness in a region’s people

| Leadership capacity | Wisdom | Knowledge & Skills | Self-Efficacy | Health |

**Indicators**
- Increase the number of food and farm businesses employing new and innovative techniques
- Improve a health outcome for a target population
- Increase the number of transactional partners (businesses, producers, growers) participating in an educational program
- Increase the number of business people and consumers participating in educational programs

**Strategies**
- Technical assistance on latest techniques
- Providing educational opportunities, including mentoring and networking
- Community leadership programs that explore community assets
Interactions Among Groups
Collective Identity
Sense of Shared Future

**Indicators**
- Increase the number of partners in a value chain
- Increase diversity of partners (number of economic sectors represented, demographic diversity, or other metric of interest to region) involved in leadership roles in the value chain
- Increase number of low-income people who engage with/influence/make decisions in the value chain
- Increase the number of volunteers in a project

**Strategies**
- Community leadership programs that explore community assets
- Opportunities and spaces for interactions among diverse stakeholders in the food system
- Place-building and space-making
Small farms band together to grow their connections to consumers who hunger for local food

At first glance, Howard’s Grocery, Café & Catering seems exactly what the name implies. When it opens next month, the grocery will carry local products, and the café will serve cheeseburgers, grilled-cheese sandwiches and seasonal fare. Owner Craig Howard will
THE DOUGLAS COUNTY
FOOD POLICY COUNCIL

✓ Established by the County
  Commission in 2010
✓ Convened as a joint City-County
  Council in 2013
✓ Identifies the benefits,
  challenges and opportunities for a
  successful food system
✓ Recommends local policies to
  support food system
✓ Represents a wide range of
  stakeholders in food system
**Water Quality**

**Soil Health**

**Natural Beauty**

**Diversity of animals and plants**

### Indicators

- Increase the number of acres of land growing produce for a market opportunity
- Increase the number of acres or sites where residents and visitors can enjoy natural amenities
- Improve regional air quality or water quality measured by national standards
- Increased volume of waste recycled, such as glass in value chains focused on bottled products

### Strategies

- Encourage farmers to diversify operations through new market opportunities
- Provide on-going technical assistance on sustainable soil and water management strategies

---

Natural Capital: The existing stock of natural resources in a region’s places
Natural Amenities are important for people to feel attached to their place and want to live there.
Political Capital: The existing stock of goodwill, influence and power that people, organizations and institutions in the region can exercise in decision-making

Indicators

- A broad range of consumers become active in food and farm policy at local, state and national levels
- Increase the number of value chain stakeholders on nonprofit boards of directors related to value chain work and on citizen’s advisory committees or task forces at area educational institutions, healthcare institutions, or other regional anchors
- Increase the number of opportunities to communicate value chain priorities to elected officials, such as through site visits, meetings or phone calls, testimony
- Increase the number of new policies supporting value chain strategies and outcomes
“Maybe at first you come because you think the food’s better for you. Before you know it you find yourself curious, finding yourself with questions. How was it grown? Were chemicals used? How were the animals treated? And at places like farmers’ markets you get to ask those questions, to people who actually have answers for you. . . . Pretty soon you start caring more about things like sustainability than you might have before. (Julian, farmers’ market)”

Perhaps in this sense especially—in growing citizens attuned to justice—we can say some of these spaces are engaging in a political project, versus practicing politics as usual. While citizenship-as membership governs conduct within social groups, more-than-active citizens seek bridges across social groups.
Built Capital: The existing stock of constructed infrastructure—for example, buildings, sewer systems, broadband, roads—in a region’s places

### Indicators
- Increase the capacity of regional infrastructure
- Improve storage capacity for regionally produced products, such as square feet of cold storage
- Grow the regionally owned/controlled processing capacity for value chain products,
- Increase the locally controlled distribution points or points of sale for regional products or services, such as regional food hubs, local retailers selling local foods or beverages, or businesses offering specialized services

### Strategies
- Developing private-public partnerships
- Investing in public goods like community owned processing or storage—or marketing and internet access
IT'S TIME TO BUILD THIS TOWN
Resilience

Capacity of the system to absorb shocks and bounce back

- Longer, specialized, centralized and consolidated supply chains are vulnerable to disruption

Tornados  Hurricanes  Floods  Pandemics  Global trade
“When Hurricane Matthew hit, the eye went directly over Simply Natural Dairy. They are grass fed, so didn’t lose feed and could keep feeding. In the past, they had received two USDA Value-Added Producer Grants to put in bottling and to establish ice cream production. Their milk is in stores, and they also have a on-farm ice cream store with agrotourism. When the hurricane hit, theirs was the only bottled milk in the local stores for over a week. This is one of the benefits of the VAPG. And this is also part of the loss of transportation and infrastructure in the hurricane.” – Scott Marlow, RAFI-USA, Pittsboro North Carolina
